Quarterly Business Review

Northwind Technologies | Q2 2026

Account Manager	Daniel Cohen
Period	Q2 2026

Executive Overview

Q2 showed continued improvement in platform adoption across Northwind's engineering organization. The customer expanded usage to two additional development teams and increased monthly active users.

Overall customer health remains positive, although adoption within the Operations department is still lower than expected.

Goals for Q2

- Increase monthly active users above 800.
- Complete SSO rollout.
- Expand usage to the Operations team.
- Reduce support ticket volume.

Performance

Metric	Q1	Q2
Monthly Active Users	640	875
Platform Adoption	61%	74%
Support Tickets	42	29
Average Resolution Time	7.2h	5.1h

Highlights

- SSO implementation completed successfully in May.
- Two additional engineering teams completed onboarding.
- Support ticket volume decreased significantly.
- Customer participated in the new Analytics beta program.

Challenges

Operations adoption remains below target. Approximately 35 users have still not completed onboarding.

The customer also reported occasional delays when generating large reports.

Risks

Low adoption within Operations could impact the planned company-wide rollout in Q3.

Next Steps

Action	Owner	Target
Complete Operations onboarding	Sarah Levi	15 July 2026
Investigate large report performance	Platform Engineering	July 2026
Prepare company-wide rollout plan	Daniel Cohen	10 August 2026
